

Centralized Reporting System (CRS) Migrated Data

FAQ

Q1: Why are we switching from ORS to CRS?

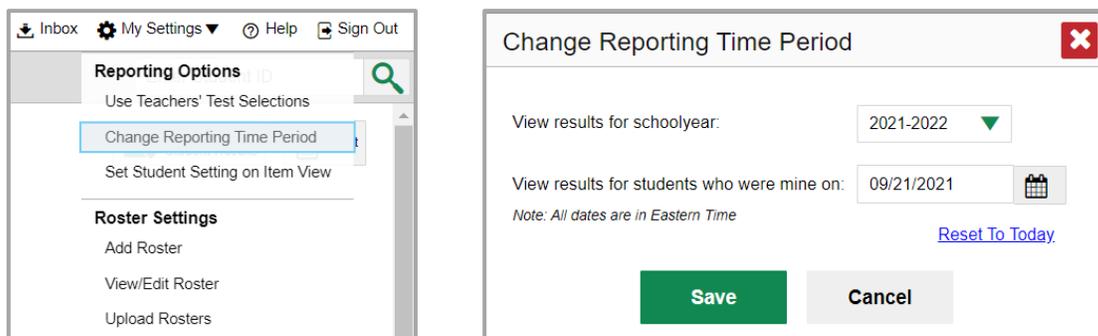

A1: CRS was designed to provide a simpler, more user-friendly reporting user interface, that works quickly, and is scalable as more data is added to it. CRS offers the ability to view students' actual responses (for Interim tests), something that was not possible in ORS. CRS was also designed to be more accessible by different devices, including mobile phones. Access to CRS has not changed. It is still using your ClassLink Login info.

Q2: How do I view summative data from a prior year in CRS?

A2: Change the reporting time period to view test results from a prior year.

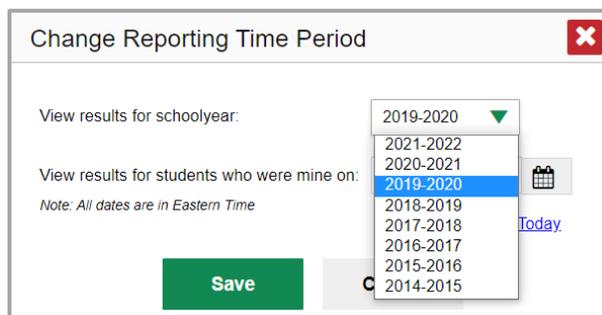

1. From the **My Settings** menu in the banner, choose **Change Reporting Time Period**. The **Change Reporting Time Period** window appears.

Figure 1. Expanded My Settings Menu and Change Reporting Time Period Window

2. From the school year drop-down list, select a school year for which you want to view test results (see [Figure 2](#)). When you set a school year for which to view tests, CRS will show data for test opportunities completed *in the selected school year*.

Figure 2. Change Reporting Time Period: View Results for School Year

In the *View results for students who were mine on* field, use the calendar tool to select a date, or enter it in the format mm/dd/yyyy (see [Figure 3](#)). In the *View results for students who were mine on* field, use the calendar tool to select a date, or enter it in the format mm/dd/yyyy. You will be viewing all the students who were associated with you on that date, and only those students. **Figure 3. Change Reporting Time Period: Students Who Were Mine On**

Change Reporting Time Period

View results for schoolyear: 2019-2020

View results for students who were mine on: 09/21/2021

Note: All dates are in Eastern Time

September 2021						
Su	Mo	Tu	We	Th	Fr	Sa
			1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30		

Close

3. Click **Save**. All reports are now filtered to show only data for the selected school year and date. To look at results from a different school year, select a different school year, input a new date, and click **Save**.

Q3: Which date do I put into the “View results for students who were mine on” field?

A3: To view your current students’ past performance, keep the date set to today. Students will be displayed in their current school, not the school they were in when they tested in the prior year.

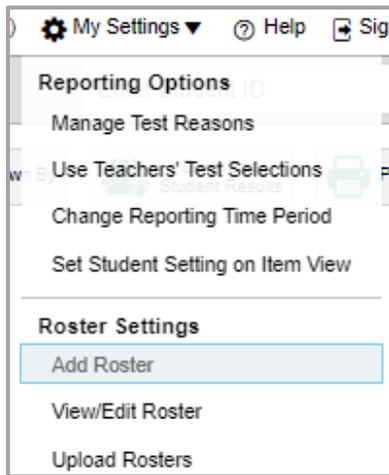

To view the performance of your former students, set the date to a day when those students were associated with you. The last day of a prior year test window is usually a good date to use. In this case, students will be displayed in the school in which they tested.

Q4: Can I create rosters to view only my current classes?

A4: TEs, TAs, SAs, DAs, DAMs, DTCs can add, edit, and delete classes (rosters). You can create new classes (rosters) from students associated with your school or district.

1. From the **My Settings** menu in the banner, select **Add Roster** (see [Figure 4](#)). The **Roster Manager** window appears, showing the Add Roster form.

Figure 3. Expanded My Settings Menu

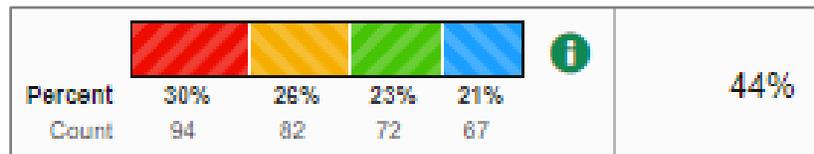

2. Follow the prompts to add students to the roster. See the [CRS User Guide](#) on the [Dessa Portal](#) for step-by-step instructions and screen shots.

Q5: What do the proficiency percentages represent in CRS?

A5: The proficiency percentages for your district and school represent the percentage of students who earned a proficient score during that school year, out of the total number of students who took the test that school year. Students who took the test in a prior year are not included in this calculation.

Figure 4. Proficiency Percentages

To disaggregate the proficiency percentage by student grade, use the Breakdown By button.

Figure 5. Breakdown By Button and Breakdown Attributes Pop-Up

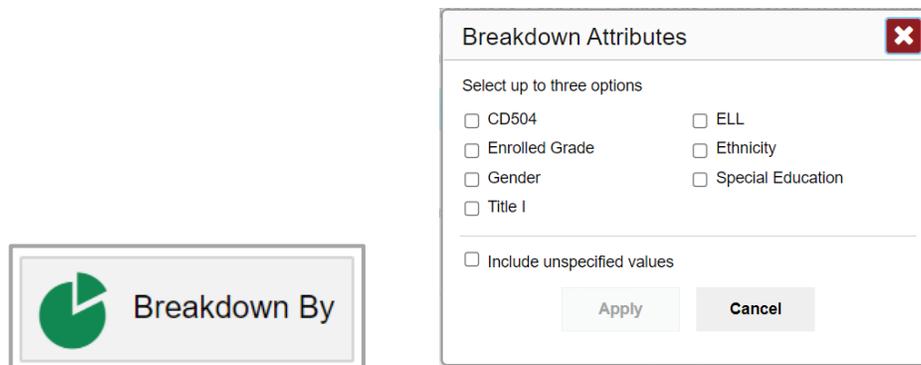

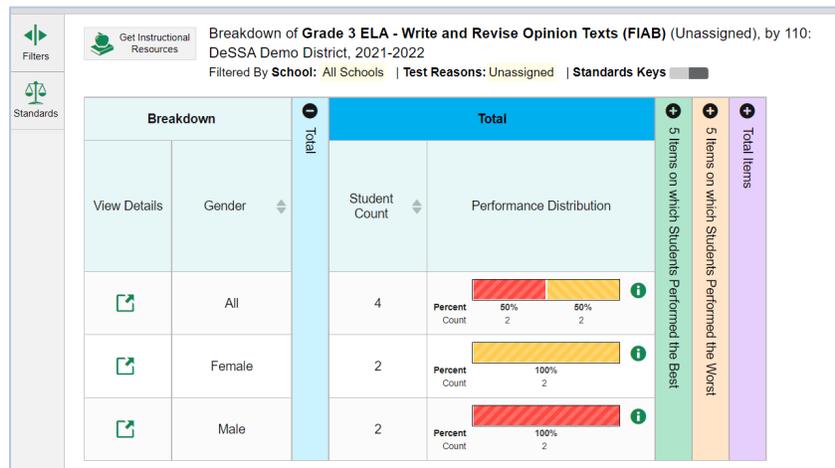

Figure 6. Proficiency Percentages Broken Down by Gender

Q6: How are results for students tested in attending vs their resident district handled in CRS?

A6: DE provides student enrolled district and student resident district. Enrolled district was only reported in ORS and now both enrolled and resident district are reported in CRS.

Note: ORS has been retired as of October 21, 2021 and all Summative and Interim data is in CRS. Refer to CRS User Guide for more information.

Q7: Is there anything else I need to be aware of when I look at prior year data in CRS?

A7: When viewing or working downloaded claim and target data from CRS, be aware that the claims and targets may appear in a different order in CRS than they did in ORS. If you have a district or school template that you are working with, you may need to manipulate the downloaded data to make sure it matches the desired format before uploading it into your template or external system.

Q8: Is there a crosswalk document explaining the format and location of reports between previous ORS and CRS?

A8: Yes, if you are not familiar to CRS and have used ORS previously, refer to ORS-CRS crosswalk for reports specificities. The URL will be added when available.

Q9: Where can I access the CRS User Guide?

A9: You can access the [CRS Interim User Guide](#), CRS Summative User Guide, and [CRS Quick Guide](#) on the [DeSSA Portal](#).
