

Delaware Parent Guide

Preparing Students for Success in

Grade 8

Your Child's Progress

*A parent resource for understanding what your child should have learned this year
as well as helpful suggestions for supporting your child's learning at home
in preparation for the upcoming school year.*

Dear Families:

In a few weeks you will receive your child's Smarter Assessment score results for this past school year. This Family Score Report provides a great deal of information about your child's scores, including how well your child performed on the test compared to other students and a chart tracking performance across school years. Please take the time to review the report thoroughly so that you understand what type of supports your child needs to progress to the next grade.

The enclosed Family Guide is meant to be used alongside your Family Score Report and offers suggestions for ways to support your child based on his or her Smarter scores. This guide outlines what your child should have learned this year as well as how to prepare for success in the upcoming school year. The information in this guide is based directly on best practices from the national Parent Teacher Association (PTA) and other states and provides guidance to help your child in English language arts/literacy and mathematics.

As you may know, Delaware uses the Smarter Assessment in grades 3 through 8 to help measure student progress toward mastery of the state's academic standards in English language arts/literacy and mathematics. While no single test tells us everything we need to know about how a student is performing in school, these test scores along with in-class work provide you with information on how your child is progressing. We encourage you to meet with your child's teachers to discuss his or her progress, raise any questions you may have, and determine how you can best support the work happening in school.

Preliminary results for Smarter were available to educators through an online reporting system about three weeks after tests were submitted for scoring. Your child's teachers were able to access these Smarter scores to assist with instructional planning. Your child's teachers for the upcoming school year will use Smarter scores to assist with instructional planning as well.

We sincerely appreciate the hard work and support provided at home to ensure that your child is ready to meet the learning goals. We welcome your feedback or suggestions for improving Delaware's Family Score Report and the enclosed Family Guide. Please email us at assessment@doe.k12.de.us or call (302) 857- 3391. Best wishes for a wonderful summer.

Sincerely yours,

Mark A. Holodick, Ed.D.
Secretary of Education

Monica Gant, Ph.D.
Associate Secretary
Academic Support Team

Subjects on the Smarter Assessment

When you receive your child's score report, you will receive an overall score as well as information on how your child is progressing in each area. These areas are aligned to the Delaware standards and tell you, your child, and your child's teachers how well your child is mastering the standards.

Mathematics

The Smarter Assessment for Mathematics is organized by three (3) areas, or claims:

Different Areas of the Mathematics Assessment		
	Concepts & Procedures	Applying mathematical concepts and procedures
	Problem Solving: Modeling and Data Analysis	Using appropriate tools and strategies to solve real world and mathematical problems
	Communicating Reasoning	Demonstrating ability to support mathematical conclusions

English Language Arts (ELA) / Literacy

The Smarter Assessment for ELA and Literacy is organized by four (4) areas, or claims:

Different Areas of the ELA/Literacy Assessment		
	Reading	Demonstrating understanding of literary and nonfiction texts
	Listening	Demonstrating effective communication skills
	Writing	Producing clear and purposeful writing
	Research/Inquiry	Investigating, analyzing and presenting information

Mathematics

What your Child Learned in Grade 7

- Analyzing proportional relationships (Example: By graphing in the coordinate plane) and distinguishing from other kinds of mathematical relationships (Example: Buying 10 times as many items will cost you 10 times as much, but taking 10 times as many aspirin will not lower your fever 10 times as much)
- Solving proportionality and percent problems (Example: Determining tax, tips, and markups and markdowns)
- Solving problems involving scale drawings
- Adding, subtracting, multiplying, and dividing positive/negative numbers; Solving related word problems
- Solving word problems that have a combination of whole numbers, fractions, and decimals (Example: A woman making \$25 an hour receives a 10% raise. She will make an additional $\frac{1}{10}$ of her salary an hour – what is her new hourly rate?)
- Solving equations such as $\frac{1}{2}(x - 3) = \frac{3}{4}$ quickly and accurately, and writing equations of this kind to solve word problems (Example: I knocked over a carton of milk, and 3 cups were spilled before I set the carton upright again. When I poured out the remaining milk equally into two measuring cups, there was $\frac{3}{4}$ of a cup of milk in each one. How much milk was originally in the carton?)
- Solving real world problems that can be modeled with an inequality such as $x > 8$ or $\frac{1}{4}(x + 5) = 21$ by answering the question: “What number does x have to be to make this statement true?”
- Solving real-world and mathematical problems involving the area (space inside) and circumference (distance around) of a circle, the area of two-dimensional objects such as triangles, and the volume (capacity inside) and surface area (total of all outside space) of three-dimensional objects such as boxes.
- Using statistics to draw inferences and make comparisons (Example: Deciding which candidate is likely to win an election based on a survey)

What Your Child Will Learn in Grade 8

- Understanding slope (rate of change) and relating linear equations in two variables to lines in the coordinate plane
- Developing the understanding that every rational number (such as $\frac{1}{2}$, 0.3, 2, or -2) can be written as a decimal, but that the decimal form of an irrational number (such as $\sqrt{2}$ or π) is both non-repeating and infinite (goes on forever)
- Solving linear equations (e.g., $-x + 5\left(x + \frac{1}{2}\right) = 2x - 8$); Solving pairs of linear equations $x + 5y = -1$ and $2x - 2y = 12$; Writing equations to solve related word problems
- Understanding functions as rules that assign a unique output number to each input number; Using linear functions to model relationships. NOTE: students don't need to use the function notation but its concept. Comparing the properties of two functions represented in different ways (table, graph, equation, or description)
- Constructing scatter plots and analyzing statistical relationships by using a best fit line (a straight line that models an association between two quantities)
- Working with positive and negative exponents, square root and cube root symbols, and scientific notation (Example: Evaluating $\sqrt[2]{36} + \sqrt[3]{64}$; estimating world population as 7×10^9)
- Understanding congruence and similarity using physical models, transparencies, or geometry software (Example: Given two congruent figures, show how to obtain one from the other by a sequence of rotations, translations, reflections, and/or dilations)
- Understanding and applying the Pythagorean Theorem ($a^2 + b^2 = c^2$) to solve problems
- Solving problems involving the volume of cylinders, cones and spheres

English language Arts/Literacy

What Your Child Learned in Grade 7

- Citing several sources of specific evidence from a piece when offering an oral or written analysis of a book, essay, article, or play
- Analyzing works of fiction to see how events advance the plot and how setting shapes the characters
- Determining an author's point of view or purpose in a nonfiction work and analyzing how the author takes a position different from other authors
- Organizing and focusing writing, including crafting supporting statements and conclusions with evidence and showing that the evidence is accurate and reliable
- Conducting research in response to a specific question by drawing on evidence from several credible literary or informational sources to support an analysis or reflection
- Avoiding plagiarism and following a standard format for citations (Example: Footnotes, bibliography)
- Evaluating a speaker's key points and reasoning, asking questions, and crafting well-supported ideas in discussions
- Presenting claims and findings to others emphasizing main points, making eye contact, speaking loudly enough, pronouncing words clearly, and using formal English when the situation calls for it
- Using common, grade-appropriate Greek or Latin affixes and roots as clues to defining the meaning of a word (Example: Semi-, semiannual, semicircle)

What Your Child Will Learn in Grade 8

- Citing the evidence that most strongly supports an analysis of what is explicitly stated and/or implied from a book, article, poem, or play
- Analyzing where materials on the same topic disagree on matters of fact, interpretation, or point of view
- Learning how authors support their ideas through word choice, sentence and paragraph structure, and other methods
- Building writing around strong central ideas or points of view; Supporting the ideas with sound reasoning and evidence, precise word choices, smooth transitions, and different sentence structures
- Planning and conducting research projects that include several steps and use many credible and documented print and digital sources
- Analyzing the purpose of information presented in diverse media (Example: Print, TV, web) and evaluating its social, political, or commercial motives
- Presenting findings and claims to others emphasizing key points with relevant evidence and sound reasoning, adapting speech to the audience and the formality of the setting, and responding to questions and comments with relevant observations and ideas
- Using strong, active verbs to create a clear picture for the reader (Example: Walk, skip, meander, lurch, limp)
- Interpreting figures of speech (Example: irony, puns) and developing a large vocabulary of general academic words and phrases

How You Can Help Your Child At Home Mathematics

Strategies to improve your child's Grade 8 math understanding:

$$\frac{a}{b} = c$$

Concepts & Procedures

Applying mathematical concepts and procedures

- Reinforce mathematics by sharing your thinking as you work through real problems, especially if it takes some time and effort to find a solution.
- Share how fractions and decimals are used during cooking, carpentry and financial calculations.
- Do an internet search for “free math games” and play games with your child.
- Encourage your child to explain how to solve problems involving negative numbers in everyday contexts, such as amounts owed or temperatures below zero.
- Use dice, cards, or coins to test probabilities.

Problem Solving: Modeling and Data Analysis

Using appropriate tools and strategies to solve real world and mathematical problems

- Encourage your child to review notes, draw pictures, and use resources to solve problems independently.
- Encourage your child to stick with a problem that may seem difficult at first. (Example: Determining the average speed of a family trip based on the distance traveled and the time taken. Estimating the time that a trip will take, given the distance and an estimate of the average speed.) Examples can also come from the news, such as a swimmer crossing the English Channel or a space probe traveling to another planet.
- Encourage your child to use what is already known to find answers for new problems.
- Discuss with your child real-world and mathematical problems involving area, surface area, and volume.

Communicating Reasoning

Demonstrating ability to support mathematical conclusions

- Ask your child to use clear definitions in discussion with others and in their own reasoning. Encourage your child to state the meaning of the symbols chosen, including using the equal sign consistently and appropriately.
- Encourage your child to justify their conclusions, communicate them to others, and respond to the arguments of others.

How You Can Help Your Child At Home

English Language Arts (ELA) / Literacy

Strategies to improve your child's Grade 8 ELA/Literacy understanding:

Reading

Demonstrating understanding of literary and nonfiction texts

- Encourage your child to read a self-selected text for at least 20 minutes each day.
- Ask your child who his or her favorite authors are. Why does your child like their books? What ideas does the author write about? Who are his or her favorite characters? Why?
- Visit museums or historical sites to increase exposure to new knowledge and vocabulary.
- Talk about the daily news. Pick a news event in a newspaper or posted online to read, and then watch a news clip on the same topic. Compare the facts, details, and points of view of the news story.

Listening

Demonstrating effective communication skills

- Encourage discussion as much as possible. Ask your child for his or her opinion on books, movies, music, or social issues. Prompt your child to express ideas thoughtfully and to back up claims with evidence.
- Discuss current events. Children can share their opinions on the issues. Prompt them to back up their claims with evidence from reliable resources.

Writing

Producing clear and purposeful writing

- Use technology to help build your child's interest in reading. Read books, magazines, newspapers, or blogs online. Have your child write a summary on the computer and use the computer to edit.
- Urge your child to use logical arguments to defend an opinion and support it with reasons and evidence.
- Encourage your child to write. Create an event flyer or a letter of complaint about a product that no longer works and is still under warranty. Children need to see writing as a real-world experience and not just as a school activity.

Research/Inquiry

Investigating, analyzing and presenting information

- If your child wants to purchase a new item, have him or her conduct research and explain why purchasing that particular brand is the best option. The explanation must be supported with facts and details.
- Urge your child to research a place he or she would like to travel to. Collect and read brochures and informational materials on that location.

Additional Resources

College and Career Planning

- **Delaware Goes to College** – <http://delawaregoestocollege.org/>
Provides information on preparing for education after high school. Includes checklists, scholarship deadlines, text messaging supports, and more. Families should begin now to ensure students select the appropriate course sequence and extracurricular activities in high school as well as understand the options for paying for college and advanced training to ensure success after graduation.
- **Khan Academy – Free personalized SAT Prep** – <https://www.khanacademy.org/sat>
Provides official, personalized SAT prep for FREE based on student PSAT scores. Includes practice tests, instructional videos, daily reminders, instant feedback and more.

Mathematics and ELA

- **Be a Learning Hero** – <http://bealearninghero.org/>
Provides help with mathematics homework, tips on reading, answers about the new tests, what your child should know grade by grade, and other topics from trusted partners.
- **Roadmaps to the Standards** – <http://www.cgcs.org/page/328>
Provides parents with detailed information about the expectations of the Common Core in mathematics for K-12. Shows what children will learn and how parents can support learning.
- **Practice Tests** – <http://www.smarterbalanced.org/assessments/practice-and-training-tests/>
Provides students with a preview of test questions aligned to the academic standards in English language arts/literacy and math for each grade. Similar in format and structure to the actual test.

Mathematics (only)

- **Khan Academy Math** – <http://www.khanacademy.org/commoncore>
Provides an extensive library of user-friendly content for K-12 mathematics. Students can practice at their own pace and make use of interactive challenges and videos. Requires online access.
- **Illustrative Mathematics** – <http://illustrativemathematics.org>
Provides mathematical tasks and solutions as well as how the tasks illustrate content standards. The site also provides videos and vignettes illustrating the Mathematical Practices.

ELA (only)

- **Adolescent Literacy** – <http://www.adlit.org>
Provides information and resources for struggling adolescent readers and writers.
- **Newsela** – <https://newsela.com/>
Provides students with daily nonfiction news articles that build comprehension skills while keeping them connected with the latest happenings around the world.
